**Examples:**
# Feedback (2.12.2, pag. 27)

*Examples of feedback.*

An initially hidden environment that uncovers itself at an appropriate feedback time.

By default, feedback is triggered by an attempt:

**Exercise   1**  *Multiple Choice:*

1. *I'm correct* ✓

2. *I'm wrong*

***Feedback(***`attempt`***):***   *I show up when this problem is attempted.*

---

OpciÃşn `correct` Feedback can be triggered by only correct answers:

**Exercise   2**  *Multiple Choice:*

1. *I'm correct* ✓

2. *I'm wrong*

***Feedback(***`correct`***):***   *I show up when this problem is answered correctly.*

---

**Problema   3**  *No, really, my favorite number is* $y = \boxed{17}$. *(Type x. Type something larger than 17. Type something smaller than 17. Type 17.*

***Feedback(***`attempt`***):***   *You made a first attempt!*

***Feedback(***$y>17$***):***   *That number is TOO BIG.*

***Feedback(***$y<17$***):***   *That number is too small.*

***Feedback(***`correct`***):***   *I have always loved the number 17.*

---
